## Available Training Types

Securonix Academy features a range of training categories

- Instructor-led Training (ILT): Our available learning paths provide role-based training to Cyber Defense Analysts and Administrators. Click on the request access link to view upcoming sessions and register for a course.
- Premium e-learning Training (PELT): Available as a curated learning path or individual courses, this content now follows a new training experience for customers and provides parity with ILT courses. Filter the course catalog by PELT to learn more about the latest courses.
- Enablement: The enablement courses have been created to deliver valuable learning opportunities such as the vCon 2024 series.
- Release Management: The courses provide insight into the latest Securonix features and functionality.

## Instructor-Led Training (ILT)
